

Desizing Enzyme WD-1

Introduction

Desizing enzyme WD-1 is a formulated α -amylase, which is produced by microbial submerged fermentation. It can be used to desize weaving fabric such as cotton, terylene/cotton, tencel, viscose, etc.

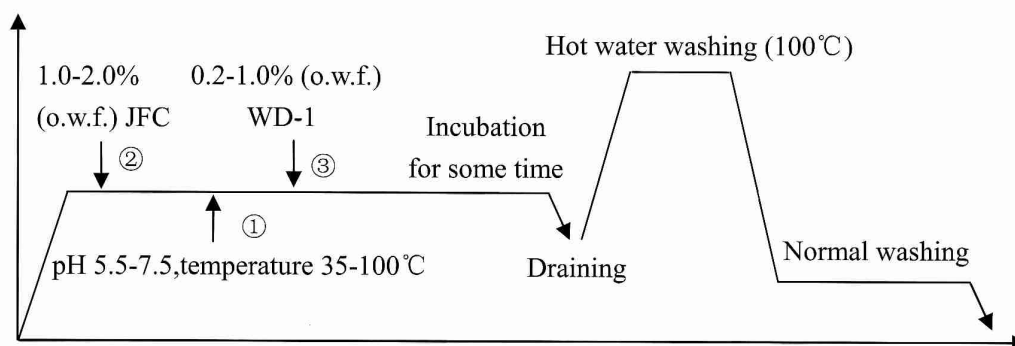

Physical and Chemical Specification

- ☆ Appearance : brown liquid
- ☆ pH value : 5.8~6.0

Advantages

- ☆ Wide temperature range
- ☆ High desizing efficiency

Direction for Usage

Packing

25Kg/plastic drum.

Storage and Safety

Store at 4~25°C under dry, shaded and cool condition and avoid high temperature and direct sunlight. Please close the container after getting the material to avoid contamination. If the enzyme gets in touch with your skin or eye, immediately flush with water for at least 15 minutes. Shelf life : 6 months.

○ Compatibility of other auxiliaries and process need to be checked before application
